Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

INDEX TO AMERICAN MYCOLOGICAL LITERATURE

Appel, O. Disease resistance in plants. Science II. **41**: 773–782. 28 My 1915.

Appel, O. Leaf roll diseases of the potato. Phytopathology **5**: 139–148. 4 Je 1915.

Appel, O. The relations between scientific botany and phytopathology. Ann. Missouri Bot. Gard. **2**: 275–285. 17 My 1915.

Atkinson, G. F. Phylogeny and relationships in the asomycetes. Ann. Missouri Bot. Gard. **2**: 315–376. *f. 1–10.* 17 My 1915.

Blakeslee, A. F., & Gortner, R. A. Reaction of rabbits to intravenous injections of mould spores. Biochem. Bull. **4**: 45–51. *pl. 2.* Mr 1915.

Carter, C. N. A powdery mildew on *Citrus*. Phytopathology **5**: 193–196. *pl. 12* + *f. 1.* 4 Je 1915.
Includes description of *Oidium tingitaninum* sp. nov.

Cook, M. T. Common diseases of apples, pears and quinces. New Jersey Agr. Exp. Sta. Circ. **44**: 1–20. *f. 1–18.* 1915.

Cook, M. T. Common diseases of the peach, plum and cherry. New Jersey Agr. Exp. Sta. Circ. **45**: 1–16. *f. 1–10.* 1915.

Edson, H. A. Seedling diseases of sugar beets and their relation to root-rot and crown-rot. Jour. Agr. Research **4**: 135–168. *pl. 16–26.* 15 My 1915.

Eriksson, J. The control of plant diseases in Sweden. Bull. Foreign Agr. Intelligence **5**: 187–192. Mr 1915.

Eriksson, J. International phytopathologic collaboration work begun in Europe—will it be prosecuted in America? Phytopathology **5**: 133–138. 4 Je 1915.

Fyles, F. A preliminary study of ergot of wild rice. Phytopathology **5**: 186–192. *pl. 11.* 4 Je 1915.

Giddings, N. J., & Berg, A. Apple rust or cedar rust in West Virginia. W. Virginia Agr. Exp. Sta. Circ. 15: 1–16. Mr 1915. [Illust.]

Gladwin, F. E. Observations relative to an obscure grape affection. Phytopathology **5**: 169–174. *f. 1.* 4 Je 1915.

Grossenbacher, J. G. Some neglected phases of phytopathology. Phytopathology **5**: 155–162. 4 Je 1915.

Harter, L. L., & Field (Tillotson), E. C. Experiments on the susceptibility of sweet potato varieties to stem rot. Phytopathology **5**: 163–168. 4 Je 1915.

Hauman-Merck, L. Les parasites végétaux des plantes cultivées en Argentine. Centralb. Bakt. Zweite Abt. **43**: 420–454. 1 My 1915.

Heald, F. D., & Studhalter, R. A. The effect of continued desiccation on the expulsion of ascospores of *Endothia parasitica*. Mycologia **7**: 126–130. 15 Je 1915.

Hedgcock, G. G. Notes on some diseases of trees in our national forests. V. Phytopathology **5**: 175–181. 4 Je 1915.

Horne, W. T. Oak fungus or *Armillaria mellea* in connection with nursery stock. Monthly Bull. Calif. State Comm. Hort. **4**: 179–184. *f. 31–33.* Ap 1915.

House, H. D. New or interesting fungi. [In Peck, C. H., Report of the state botanist, 1913.] N. Y. State Museum Bull. 176: 19–21. 1 Je 1915.

Includes *Hebeloma palustre* Peck, *Inocybe euthelella* Peck, and *Clitocybe phyllophiloides* Peck.

Hubert, E. E. A new *Macrophoma* on galls of *Populus trichocarpa*. Phytopathology **5**: 182–185. *f. 1–3.* 4 Je 1915.

Morse, W. J., & Shapovalov. The *Rhizoctonia* disease of potatoes. Ann. Rep. Maine Agr. Exp. Sta. **13**: 193–216. *f. 61–73.* 1914.

Murrill, W. A. Fungi edible and poisonous. Mycologia **7**: 151–154. 15 Je 1915.

Murrill, W. A. Illustrations of fungi—XX. Mycologia **7**: 115–120. *pl. 158.* 15 Je 1915.

Clitocybe illudens, Hypholoma lacrymabundum, Mycena pura, Collybia platyphylla, Lepiota amianthina, Lentodium squamosum, and *Hypholoma Candolleanum* are illustrated.

Murrill, W. A. Luminescence in the fungi. Mycologia **7**: 131–133. 15 Je 1915.

Murrill, W. A. Tropical polypores. i–iv + 1–113. New York 15 Je 1915.

Murrill, W. A. The validity of *Clitocybe megalospora*. Mycologia **7**: 157, 158. 15 Je 1915.

Peck, C. H. Report of the state botanist, 1913. N. Y. State Museum Bull. 176: 1–77. *Pl. A, B* + *1–17*. 1 Je 1915.
Includes articles by H. D. House here indexed separately.

Pierce, R. G. The present status of the chestnut bark disease. Arborea **1**: 8, 9. My 1914.

Pool, V. W., & McKay, M. B. *Phoma betae* on the leaves of the sugar beet. Jour. Agr. Research **4**: 169–177. *pl. 27*. 15 My 1915.

Potter, A. A. The loose kernel smut of sorghum. Phytopathology **5**: 149–154. *pl. 10* + *f. 1, 2*. 4 Je 1915.

Reed, H. S., & Grissom, J. T. The development of alkalinity in *Glomerella* cultures. Jour. Biol. Chem. **21**: 159–163. My 1915.

Shapovalov, M. Effect of temperature on germination and growth of the common potato-scab organism. Jour. Agr. Research **4**: 129–133. *pl. 15* + *f. 1*. 15 My 1915.

Smith, C. O. Walnut blight or bacteriosis. Monthly Bull. State Comm. Hort. Calif. **4**: 254–258. *f. 56*. Je 1915.

Smith, R. F. A conspectus of bacterial diseases of plants. Ann. Missouri Bot. Gard. **2**: 377–401. 17 My 1915.

Spaulding, P. Forest fungi of Bethel. Vermont Bot. & Bird. Bull. **1**: 24, 25. Ap 1915.

Stewart, F. C., & Sirrine, F. A. The spindling-sprout disease of potatoes. N. Y. Agr. Exp. Sta. Bull. 399: 133–143. *pl. 1–3*. Mr 1915.

Thom, C. The *Penicillium luteum-purpurogenum* group. Mycologia **7**: 134–142. *f. 1*. 15 Je 1915.

Townsend, C. O. Field studies of the crown-gall of sugar beets. U. S. Dept. Agr. Bull. 203: 1–8. *pl. 1, 2*. 30 Ap 1915.

Townsend, C. O. Leaf-spot disease of the sugar beet. U. S. Dept. Agr. Farmers' Bull. 618: 1–18. *f. 1–10.* 8 O 1914.

Wakefield, E. M. *Fomes juniperinus* and its occurrence in British East Africa. Kew Bull. Misc. Inf. **1915**: 102–104. Ap 1915. [Illust.]

Includes notes on other related American species.

Westerdijk, J. Phytopathology in the tropics. Ann. Missouri Bot. Gard. **2**: 307–313. 17 My 1915.

Wilson, O. T. The crown-gall of alfalfa. Science II. **14**: 797. 28 My 1915.

Young, E. Studies in Porto Rican parasitic fungi—I. Mycologia **7**: 143–150. 15 Je 1915.

Includes fifteen new species in *Phyllosticta.*

Zeller, S. M. Notes on *Cryptoporus volvatus.* Mycologia **7**: 121–125. *pl. 159 + f. 1.* 15 Je 1915.
